

Specialist Pathology Order & View System

Specialist Pathology at The Royal Marsden is performed by a range of diagnostic departments located at both Chelsea and Sutton. These departments offer clinical diagnostic services to other NHS Trusts, networks and to the independent sector. We also provide clinical support to research trials within the public and independent healthcare sectors.

Tests from the following laboratories can be requested via Order & View:

- Cytogenetics
- Immunophenotyping
- Molecular Diagnostics
- Histopathology

What is Order & View?

The Specialist Pathology Order & View system is a new way to request pathology tests and view the results online. It is the latest development in our bid to offer the highest standard of clinical services.

This online system replaces the previous paper-based process and in doing so provides greater convenience, increased efficiency, quicker turnaround time, a clear audit trail and, ultimately, a better standard of care for patients.

Order & View Video Tutorial

The video tutorial is designed to help you start using the Order & View system, and is divided into two areas: users and administrators. The whole video tutorial will take approximately 35 minutes.

Users Menu

The users menu is for those who are responsible for ordering specialist pathology tests within your organisation and covers the following tasks:

- [Log in](#)
- [Log in from outside the NHS](#)
- [Forgotten password](#)
- [Create order for existing patient](#)
- [Create order for new patient](#)
- [View test results](#)
- [Update your user profile](#)
- [Using the Help function](#)

Administrators Menu

The Administrators Menu is aimed at those individuals who have been selected to be the Local Organisation Administrator for your organisation, and are the key people who will provide support and advice. This section covers the following Administrator-only tasks:

- [View organisation details](#)
- [Configure organisation email domains](#)
- [Add a new user](#)
- [View or remove an administrator](#)
- [Service level agreements](#)
- [Configure organisation alerts](#)
- [Search or update patient details](#)
