Research and Audit

Dr Clare Shaw, Consultant Dietitian, is the Research Lead for Therapy Services and oversees research within the Therapies department. She is also working with the RM and ICR Biomedical Research Centre to implement the NIHR collaborative on Cancer and Nutrition. Within Therapies there is an AHP researcher and a part time Data Manager managing an AHP research portfolio. The research portfolio is an integral part of the Applied Health Research Strategy led by Professor Theresa Wiseman and research carried out is in line with the four key principles of this strategy and contributes to the Biomedical Research Centre and National Institute of Health Research agenda. Research includes collaborations with nursing, medical and surgical colleagues as well as with academics and clinicians around the world. There is a strong culture of evidence based practice throughout the department and discussion of research and service evaluation at Rehabilitation Forums, Therapy Strategy meetings and in individual department meetings. Monthly research meetings are held to monitor progress of research studies and to ensure good clinical research governance. The strong support provided by the team of researchers enables studies to be completed, analysed and submitted to peer review journals for publication.
